SECURITY CLEARANCE

As a condition of employment and for purposes of determining a person's qualifications for employment, the contractor shall undertake a criminal history record background check for all cleaning personnel assigned to work at the County Buildings.

The contractor shall submit to the New Jersey State Police Bureau of Identification (SBI) an "application" fingerprint card, a request for criminal history record information form (SBI-212B), and the appropriate fee for all cleaning personnel it may assign to work at this Hamilton Complexes. The contractor shall not permit any newly hired, re-hired or transferred cleaning personnel to work in a facility until the SIB has furnished the results of the criminal history record background check to the vendor.

The contractor will be required to retain the results of an individual's criminal history background check as long as that person is assigned to this contract. The results of the criminal history background check will be made available to the Contract Manager by the contractor upon request.

The contractor must ensure that all of his personnel and the personnel of any subcontractor observe all regulations in effect including security sign-in/sign-out procedures. Under no circumstances will the contractor or its personnel represent themselves as employees of the County. The above mentioned sign-in procedure and sign-in sheet will be the official record of employees for all purposes of this contract. This shall be used by the Contract Manager for contractor employee and work verification purposes.

The contractor must develop and maintain an ongoing and current written list of all contractors' personnel used on the contract. This list must be updated and supplied in writing to the Contract Manager at least twenty- four (24) hours before a new employee reports for work. This list must include a current active list of the "pool" of back-up employees required under the various staffing requirements of this RFP. It must include the employee's full name, and date of birth. When new personnel are assigned, this information must be given to the Contract Manager immediately and clearly identified as an update to the initial list. The contractor shall undertake and receive the results of the criminal history record background check for all cleaning personnel prior to submitting the updated list to the Contract Manager for approval and therefore, before assigning the employee to work.

Any contractor's employee reporting to work without a uniform and company identification badge will not be permitted to remain in the building. Any such employee will not be considered to be in attendance for purposes of meeting the mandatory minimum total cleaning hours. The contractor is responsible for replacement of the employee as soon as possible or within one (1) hour from the required "pool" of employees with pre-approved security clearances. The contractor is fully responsible for the conduct of their employees on County premises.

CLEANING RELATED REQUIREMENTS

All areas are to be considered office type space. The contractor must furnish all of the necessary supervisory, labor and criminal history background checks for all cleaning personnel. The contractor must furnish the necessary equipment, materials and supplies required to provide janitorial services as described in the request for bid. The County shall furnish hand-soap, paper towels, toilet tissue, and trash can liners. The Contractor shall furnish and provide for all other cleaning supplies and equipment necessary for the proper execution of this contract such as but not limited to waxes, strippers, cleaners, buffers, vacuum cleaners, mops and buckets. All cleaning products shall have qualities that will protect the environment, "environmentally friendly".

MANDATORY REQUIREMENT FOR CLEANING PRODUCTS

The County requires bidders to provide environmentally preferable cleaning products. The acceptable standards established for the performance of these products are based on:

- A. The Green Seal Standard for Industrial and Institutional Cleaners (GS-37)
- B. The Environmental Choice Program Certification Criteria Document (CCD-146)
- C. The US Environmental Protection Agency's Design for the Environment (DfE).
- D. The Green Seal Standard for Floor –Care Products- Finishes and Strippers (GS-40)
- E. The Environmental Choice Program Certification Criteria Document (CCD-147)

A. Green Seal GS-37 Industrial and Institutional Cleaners

Green Seal is an independent, non-profit organization that strives to achieve a healthier and cleaner environment by identifying and promoting products and services that cause less toxic pollution and waste, conserve resources and habitats, and minimize global warming and ozone depletion. The Green Seal (GS-37) standards establish environmental requirements for industrial and institutional general-purpose, bathroom, and glass cleaners. For purposes of this standard, general-purpose, bathroom, and glass cleaners are defined as those cleaners intended for routine cleaning of offices, institutions, warehouses, and industrial facilities. Product users should follow the manufacturers' instructions on compatibility. Each criterion states whether it applies to the undiluted product or to the product as used. Green Seal has no financial interest in the products that it certifies or recommends or in any manufacturer or company. Green Seal's evaluations are based on state-of-the-art science and information using internationally recognized methods and procedures. For more information, visit their website at (<http://www.greenseal.org>).

B. The Environmental Choice Program (ECP)

Established in 1988, the ECP was the second national ecolabelling initiative undertaken. There are now more than three dozen such programs worldwide. The Global Ecolabelling Network (GEN) is an international association of ecolabelling programs, including the Environmental Choice Program. For more information, visit their website at (<http://www.environmentalchoice.com>)

C. The US Environmental Protection Agency's (EPA)

Design for the Environment (DfE) Formulator Program offers partnership and recognition to companies that act as environmental stewards by improving the environmental profile of their products. Innovative and improved cleaning formulations contain

ingredients with lower inherent toxicity, less bioaccumulation potential, less toxic byproducts and more rapid biodegradability. DfE partnership entails an ongoing relationship with EPA, formalized in a voluntary memorandum of understanding. EPA and partner companies work toward mutually agreed upon goals to improve the environmental performance of cleaning products and systems. For more information, visit their website at (<http://www.epa.gov//dfe/pubs/formulat/brochure/>)

D. Green Seal GS-40 Floor Care Products – Finishes and Strippers

This standard establishes environmental requirements for industrial and institutional floor-care products. The floor care products addressed by this standard include floor finish and floor finish stripper. For purpose of this standard, floor finish (also called floor polish) is defined as any product designed to polish, protect, or enhance floor surfaces by leaving a protective

wax, polymer or resin coating that is designed to be periodically removed (stripped) and reapplied. Floor finish stripper (or floor remover- referred to here as “stripper”) is defined as a product designed to remove floor finish through breakdown of the finish polymers, or by dissolving or emulsifying the finish, polish, or wax. This standard does not address general- purpose cleaners that can be used to clean floors, floor sealers, spray buffing products, or products designed to remove floor wax solely through abrasion. Product users should follow the manufacturers’ instruction on compatibility. Each application must be designed to work together in an environmentally preferable system of overall floor care. Therefore, both the finish and its compatible stripper must meet all these criteria unless otherwise indicated. Each criterion states whether it applies to the undiluted product or the product as used. All criteria pertain to both finishes and strippers unless otherwise indicated. <http://www.greenseal.org>

E. The Environmental Choice Program Certification Criteria (CCD-147) Hard Floor Care Products.

The Environmental Choice Program is designed to support a continuing effort to improve and maintain environmental quality by reducing energy and materials consumption by minimizing the impacts, pollution generated by the production, use and disposal of goods and services available to Canadians. Hard floor care products that fall under these criteria include floor finishes, floor strippers, and neutralizing solutions, floor finish restorers and sealers. The product group includes solutions for use on ceramic, terrazzo, vinyl composite tile, concrete linoleum, rubber, and marble surfaces. It does not include products designed for unfinished wood floors, or products designed to cure concrete surfaces. These criteria do not apply to floor cleaners <http://www.environmentalchoice.com>

RECYCLING

Contractor must empty recycling container(s) in the proper recycling hamper(s) or storage bin(s). Containers are located outside of the building.

LEVEL OF CLEANLINESS FOR ALL TASKS

The contractor must provide cleaning as thoroughly and frequently as specified. NO INDIVIDUAL WORK STATIONS SHALL BE CLEANED OR ACCESSED. The contractor must supply the mandatory hours specified. Failure to meet the level of cleanliness standards shall lead to formal complaints and possible cancellation of the contract.

The level of cleanliness must meet the minimum acceptable standards as indicated below:

- 1) Clean, Dust or Damp Wipe: Free of dust, dirt, wax build up, smudges, marks, spots, stains, or film. Thoroughly cleaned and dusted from the complete surface from corner to corner and including corners, edges, sides, top, bottom of the surfaces, molding, crevices, ledges and any hardware attached. Free from spots, smudges, stains, watermarks and rings. No dust streaks. Damp wiping must be dried to provide a uniform appearance.
- 2) Wipe Dry: Drying with a suitable cloth, free of smudges, scuffs, marks, streaks and film, buffed for a uniform polished appearance.
