Mercer County Roadway - Utility Trench Detail

- Two lanes of traffic, one in each direction, must be maintained at all times.
- All truck traffic, including deliveries, must be in uniform orVersa overlay of Versa and S-8000 material and installed per manufacturer's instructions. Additional surcharge for hand labor.
- A pump-out of the trench shall be performed if the trench is unsuitable for the proposed use. Additional surcharge for hand labor.
- All excavation shall be performed by the contractor. Additional surcharge for hand labor.
- The temporary road shall be placed after the trench has been filled and compacted. The temporary road shall be of the same width as the final road and shall be beamed up to the level of the permanent road.
- The temporary road shall be removed within 24 hours of completion.
- The trench shall be restored to its original condition. Additional surcharge for hand labor.

At the end of each work day, all trenches must be backfilled and checked for alignment with an appropriate string line. If the traffic can flow safely, an inspection will be needed at the end of the work day. If the traffic cannot flow safely, the inspection will be performed by the road supervisor.

The road opening permit is valid for fifteen (15) days. All work shall be performed within the permitted time frame. The contractor must be on-site at all times. The County shall have the right to close the road at any time for unforeseen circumstances or if the work is not completed as required.
