

REBUILD NEW JERSEY

About US

Rebuild New Jersey was born during the public health crisis of 2020. We service all of New Jersey and are dedicated to meeting the challenges of a rapidly changing world.

Our services include, but are not limited to: commercial construction, janitorial and disinfecting services, residential construction, restoration and full spectrum site management.

Core Competency

Our strength here at Rebuild New Jersey is in two key elements: problem solving and the level of training invested into each member of our team. We take pride in our work and our workers and we are not afraid to get creative in order to get the job done!

Differentiators

Emphasis on public safety and industry education are what sets us apart from the rest. Our team has over 15 years of experience in the fields of construction, maintenance, public health and safety and project management and we believe in investing in our team.

As a minority-owned business entity, we know the value in giving people access to a roadmap for a brighter future. We employ New Jersians and give them access to educational programs, allowing them a chance to grow their skills and their ability to earn higher wages.
